

The Amateur Radio Service is a valuable resource that must be protected by the FCC. Amateur Radio, provides both a public service and emergency communications in times of need.

The present FCC Part 15 limits for this technology already can result in substantial interference potential to amateur frequencies. BPL systems that radiate on wide swaths of spectrum and that occupy entire neighborhoods have greater interference potential than localized systems, such as switching power supplies or electric motors.

I am against relaxing the rules governing BPL systems that would potentially cause additional interference to the Amateur Radio Service.

Sincerely,

Stephen B. Hajducek, N2CKH
